

MY CHEMICAL HEART

The black and blues, they have never gone
Her eyes are looking red like all the time
She needs someone to take her back to life
But needles are stinging more than a knife

Maybe this time
You can be fine
And we can do whatever we want
But if you'll gone
I wanna come
So we can live forever young

My chemical heart
We might apart
These are last times
Let's act like fine
Little white lies
They can save us
Like the pills done
Or we might be drown
My chemical heart

Kemo is not working anymore
Her bones are looking bad than it's before
Her hairs are gone , her lips are chapted, dry
But she's trying to hold her life more

Maybe in next life
We can have more
Like we wanted before
There will be sadness
Time may can fix this
And at the end we can be forever exist

My chemical heart
We might apart
These are last times
Let's act like fine
Little white lies
They can save us
Like the pills done
Or we might be drown
My chemical heart

Be my past ,be my last
Be everythig i've asked
Take my time, take my life
But be happy in the end

My chemical heart
We are apart
Our time is done
I can't be fine
The truth is hurt
More then a burn
Pills can't saved you
They never do
My dead angel heart
